OPEN SOURCE

Popular Movies Android App

https://github.com/ashwinath/Android_Popular_Movies_App

Java Android

- First application I wrote as a marketing student in university.
- Downloads movie information sorted according to popularity/ratings/upcoming movies.
- Read reviews, watch trailers and a favourites system.

Personal Website

<https://github.com/ashwinath/personal-site>

Node.js, Express.js, NodeMailer

- A small webapp to display information about myself, as well as a contact me form.
- A personal blog attached to pen down my thoughts.
- Hosted using a virtual private server using Linux.

Stocks Analyser (In Development)

<https://github.com/ashwinath/stock-analyser>

Node.js, Electron, React.js, Plotly.js

- A desktop app that downloads stock information based on user input and plots a candlestick graph.
- Plans to add technical analysis for the stock as well as various features to help with better analysis.
